Approximation Rolls and 2003/12/04: CIA-RDP78 1051176-000100010104-BFINAL

- 1. The environment of the clean room which houses the High Precision Stereo Comparator (HPSC) was brought under control the last day of August. Since that time, the room has been operating within temperature and humidity specifications.
- 2. Since the first part of September, has been working on the final assembly and checkout of the HPSC. Some time was lost when special electronic parts failed and spare replacement parts were not readily available.
- 3. The debugging of the classified portion of the computer program is nearing completion. Except for several small electronic problems the HPSC is essentially complete. These problems are expected to be corrected within a day.
- 4. If no further problems are encountered the acceptance tests for the HPSC will start on 14 or 15 October and should be completed during the last week of October.
 - 5. Total Authorized Funds:
